Marketplace

filters lots

This screenshot shows the search interface on the right side of the Marketplace. It includes sections for 'Local listings', 'Buy-and-sell groups', and 'Sale events'. The 'Top categories' section lists 'Vehicles', 'Properties for rent', 'Womenswear', 'Menswear', 'Furniture', and 'Electronics'. A handwritten note 'Search categories' points to the search bar in the top right corner.

It's now free to sell

Why sell on eBay?

- It's now free**
Selling on eBay is now completely free. We've removed transaction fees for private sellers in all categories, except Vehicles.
- It's easy**
List any item in minutes using AI-powered descriptions and photo-enhancing tools.
- It's safe**
You're fully protected from events out of your control and if you need help, our customer service is there.

- filters - price range, category, location

- Admin page

- manage user accounts and product listing

- Product details page

- product images, description, price and seller info

- add to wishlist/saved button

- message / comment to seller button

- Checkout page?

- Do we want to implement paying online?

- Fb marketplace - no paying system and successful?

- Payment form - stripe?

Project Overview

Key features ideas:

- User listings - students can post items with photos, descriptions and prices and others
- Search and filters - find items by category, price range or location or keyword
- Messaging System - maybe difficult / challenging to implement but a chat for buyers/sellers can chat
- Verification - maybe so only registered uni emails can sign up
- Wishlist + notifications - Save items for later and receive alerts about when a product is sold/uploaded.

Roles?

- project lead / documentation specialist
 - + oversee project, manage timeline and coordinate tasks
 - + leadership abilities, organisational skills
 - + strong writing and documentation skills
 - may not feel confident with coding

• UI/UX Designer

Design user interface for the website work alongside frontend developer
+ strong design skills

Front end developer

Work with UI/UX designer to create the designs into a working website. Works with backend dev as well to integrate front end with back end

- + proficient in HTML, CSS, JavaScript
- + comfortable coding and troubleshooting front end features

Backend developer
develop

+ good with backend languages python php?

Node.js?

+ Database integration
